

GEOXOL Granules

Soil Conditioner

GEOXOL Granules is a proprietary blend of ingredients formulated to rejuvenate soils for sustainable productivity. Certified organic (allowable input) in Australia.

Active Ingredients:

Vinasse	30.0%
Diatomaceous earth	45.0%
Fulvic acid	5.0%
Fish protein hydrolysate	10.0%
Calcium lignosulfonate	8.0%

Benefits:

- All ingredients used in the product are eco-friendly and residue free
- Improves soil physical properties like water holding capacity, aggregation stability
- Improves fertiliser efficiency
- Improves soil health by stimulating microbial growth

Application Rates:

20kg/hectare/application. Higher doses of up to 50kg/Ha/application are recommended for problematic soils
Mode of application: Soil application
Time of application: Along with pre-plant fertiliser in row crops and granular fertiliser in horticultural crops

Recommended Crops:

Suitable for all crops where granular fertilisers are used

Precautions:

- Geoxol Granules are compatible with most inorganic fertilisers/organic fertilisers/micronutrients/soil amendments.
- Adopt all precautions recommended for soil application.
- Keep out of reach of children and pets.
