

# MYCOXOL 4G

## Biofertiliser

**MYCOXOL 4G** is a water soluble, fine powder blend of different species of Vesicular Arbuscular Mycorrhiza (VAM) fortified with plant available silicon and seaweed extracts, which have a synergistic effect on plant root development. Mycoxol 4G increases root's surface area for nutrient uptake and plays a key role in improving soil biology and soil chemistry enabling conducive environment for plant growth. Certified organic (allowable input) in Australia.

#### Active Ingredients:

Mycorrhiza (VAM)	29.8%
Proprietary seaweed extract	21.2%
Natural organic acids	3.0%

#### Benefits:

- Increases root biomass
- Improves nutrient and water status of crop
- Promotes vigorous healthy plants
- Reduces incidences of soil-borne diseases

#### Application Rates:

500g/hectare/application for drip irrigation, soil drenching and soil treatment and 10g/litre of water for seed treatment

Mode of application: Drip irrigation, seed-treatment, soil drenching and soil treatment

#### Recommended Crops:

Suitable for all field crops, fruits and vegetables

#### Precautions:

- Do not apply with chemical pesticides.
- Adopt all precautions recommended for soil applications.
- Keep out of reach of children and pets.
