

# NUTRIN BORON

**Micronutrient**

**NUTRIN Boron** is a 10% boron ethanolamine water soluble formulation that is rapidly absorbed and assimilated by the crop. Its application promotes calcium mobility and assimilation and plays an important role regulating plant hormone levels and building cell wall strength. Boron also plays a key role in the production of pollen for better flower to fruit conversion.

**Active Ingredients:**

Boron (as B) min 10.0% by weight

**Benefits:**

- Improves plant uptake and assimilation of boron
- Helps the transport of calcium around the plant
- Improves flowering & fruit-set
- Strengthens the cell wall

**Application Rates:**

100-200ml/hectare/application or 3ml/litre of water. Application at pre-flowering stage is recommended for desired impact on plants  
Mode of application: Foliar spray

**Recommended Crops:**

Suitable for all field crops, fruits and vegetables

**Precautions:**

- Nutrin Boron is compatible with most agrochemicals. A "Jar Test" is recommended before use.
- Adopt all precautions recommended for foliar sprays.
- Keep out of reach of children and pets.
